Comic Relief

“With the recently developed capability of loading bibliographic records by the thousands ... the ease with which a catalog’s credibility can be destroyed has taken a quantum leap forward.”

“Keeping your online catalog from degenerating into a finding aid [due to batch loading]”

Where to start

Your **ILS** documentation/customer support

- How to load records
- How to make mass changes to records in the catalog e.g. rapid update, global update
Where to start

Vendors who provide batch-loadable records or large content collections

• Where to get MARC files
• How changes to the collection are dealt with
• Pre-customization of MARC records by the vendor
Where to start

Review your local practices

• Do we need these local edits?
• Are “single record” approaches desirable? Realistic?
Where to start

MarcEdit

• Find & replace
• Add, delete, change tag, check for presence of fields
• Create short form records from a title list
• More...

See MarcEdit Basics PowerPoint by Mary Aycock for a sense of the possibilities
OhioLINK batch cataloging

- OhioLINK distributes batch loadable records for collections purchased by the consortium
- Most record sets have been at least minimally customized by volunteer cataloger(s)
- Moving toward more acceptance of existing vendor/OCLC records, less extensive local editing
